## 2024 McLaren 750S

### Lighter. Faster. Sharper. The Pinnacle of McLaren's Supercar Evolution.

The **2024 McLaren 750S** is the ultimate expression of McLaren's supercar DNA—refined, reengineered, and focused solely on the driving experience. As the successor to the iconic 720S, the 750S brings increased power, reduced weight, and enhanced aerodynamics, making it the lightest and most powerful series-production McLaren road car ever built.

Finished in a sleek and understated **Ceramic Grey exterior** with a performance-focused **Black interior**, this supercar is designed for the track, made for the road, and tailored for Dubai's high-performance lifestyle.

### Exterior — Aerodynamic Art in Ceramic Grey

The **Ceramic Grey finish** highlights the sculpted fluidity of the 750S's bodywork. Every curve is functional, every surface engineered to move air with purpose. A **redesigned front splitter**, **lengthened active rear wing**, and more aggressive **rear diffuser** not only enhance downforce but give the 750S a sharper, more commanding presence.

Super-lightweight forged wheels, McLaren's signature dihedral doors, and LED lighting complete its visually striking, aerodynamically optimized silhouette.

### Interior — Minimalist Focus in Black

The **Black Alcantara interior** is designed for the purist. Every element is centered around the driver — from the fixed digital display mounted on the steering column to the intuitive toggle controls and driver-focused ergonomics.

Lightweight carbon fiber racing seats, satin black finishes, and a stripped-back aesthetic ensure nothing gets between you and the road. The central infotainment screen integrates seamlessly with McLaren's telemetry systems, while optional creature comforts preserve everyday usability.

### Performance — Twin-Turbo V8, Track-Calibrated

At the core of the 750S lies a **4.0-liter twin-turbocharged V8**, pushing out **740 horsepower** and **800 Nm of torque**. With launch control engaged, it sprints from **0 to 100 km/h in just 2.8 seconds**, and **200 km/h in under 7.2 seconds**, placing it among the fastest production supercars in the world.

The **seven-speed dual-clutch gearbox**, **Proactive Chassis Control III**, and reduced curb weight (30 kg lighter than the 720S) give the 750S incredible responsiveness and balance — whether carving through mountain passes or stretching its legs on Dubai Autodrome.

### **Made for Dubai's Supercar Culture**

In a city that lives for the extraordinary, the **McLaren 750S** delivers thrilling performance and aesthetic refinement. Its **Ceramic Grey exterior** exudes sophistication, while the **Black interior** speaks to the purist's soul — a perfect fusion of raw engineering and design elegance.
