2023 Ferrari SF90 Spider Assetto Fiorano

Unmatched Performance. Open-Air Innovation. The Pinnacle of Hybrid Supercars.

The **2023 Ferrari SF90 Spider Assetto Fiorano** redefines the open-top supercar experience — combining Ferrari's most powerful hybrid V8 with the lightweight precision of the **Assetto Fiorano** package. Finished in a commanding **Black exterior** with an elegant **Ivory interior** and loaded with **carbon fiber components**, this SF90 Spider blends motorsport heritage with futuristic performance.

Now available at **Exotic Cars Dubai**, it is the ultimate fusion of speed, luxury, and open-air drama.

Exterior — Black Elegance with Carbon Fiber Purpose

The **deep Black paintwork** gives this SF90 Spider an aggressive, stealth-inspired presence. Paired with the **Assetto Fiorano package**, the car features:

1. **Carbon fiber front splitter, side skirts, and rear diffuser**
2. **Carbon fiber rear spoiler and hood louvers**
3. **Lightweight titanium springs**
4. **Optional lexan rear window**
5. **High-performance Michelin Cup 2 tires**

This convertible Ferrari offers the thrill of top-down motoring with the aerodynamic efficiency and sharp handling of a track car — a rare combination in the world of hypercars.

Interior — Ivory Leather with Carbon Fiber Refinement

Step inside the **Ivory leather cabin**, where performance meets tailored luxury. The light interior contrasts beautifully with the Black exterior, and is complemented by **exposed carbon fiber trim** across the dashboard, center tunnel, steering wheel, paddle shifters, and door panels.

The cockpit is wrapped around the driver with Ferrari's curved digital instrument cluster, touch-sensitive controls, and **F1-inspired ergonomics** — ensuring everything is positioned for instinctive control and total immersion.

Performance — Electrified V8 with 1,000 CV of Power

At the heart of the SF90 Spider is a **4.0-liter twin-turbocharged V8** paired with **three electric motors**, delivering a combined **1,000 CV (986 horsepower)**. With **all-wheel drive**, the Spider accelerates from **0–100 km/h in just 2.5 seconds**, offering instant torque, razor-sharp handling, and lightning-fast gear shifts through the **8-speed dual-clutch transmission**.

The **Assetto Fiorano package** enhances the car's weight-to-power ratio and handling characteristics — giving it even sharper track dynamics without compromising road comfort.

Built for Dubai's Boldest Drivers

With its **Black exterior**, bespoke **Ivory interior**, and full **carbon fiber specification**, the **SF90 Spider Assetto Fiorano** is more than a hypercar — it's a collectible built for those who demand exclusivity, engineering excellence, and the thrill of open-top Ferrari driving at the highest level.

Now Available at Exotic Cars Dubai
