2024 Lamborghini Huracán EVO Spyder

Naturally Aspirated Drama. Open-Top Emotion. The V10 Spyder Redefined.

The **2024 Lamborghini Huracán EVO Spyder** is a pure expression of performance, emotion, and design. As the open-top variant of Lamborghini's acclaimed EVO series, this Spyder is engineered to heighten every sensation — from the roar of the V10 to the rush of wind under Dubai's skyline. Finished in a head-turning **Blue exterior** with a **Black soft roof** and a **Black interior** featuring **carbon fiber bucket seats**, this is a supercar made for those who demand open-air drama without compromise.

Now available at **Exotic Cars Dubai**, this EVO Spyder is elegance and aggression in equal measure.

Exterior — Blue Brilliance with Road Presence

The **Blue paintwork** gives this Huracán EVO Spyder an exotic and unmistakable look. Sharp aerodynamic lines, Y-shaped LED headlights, large side air intakes, and a dynamic rear diffuser all contribute to its aggressive stance and aerodynamic performance.

The **Black soft-top roof** folds away in just 17 seconds at speeds of up to 50 km/h — transforming this raging bull from a coupe to a convertible with ease, and letting you enjoy every note of the V10 under Dubai's open skies.

Interior — Black Alcantara & Carbon Fiber Command

The **Black interior** is designed for serious drivers. It features **lightweight carbon fiber bucket seats** that provide support during aggressive cornering while maintaining a refined, motorsport-inspired feel.

Lamborghini's advanced **8.4-inch touchscreen infotainment system** is housed in a center console angled toward the driver, providing full control over performance modes, media, and telemetry. The minimalist, fighter-jet-like cockpit ensures every detail is focused on the thrill of the drive.

Performance — Naturally Aspirated V10 Perfection

At its core lies a **5.2-liter naturally aspirated V10**, delivering **631 horsepower** and **600 Nm of torque** to all four wheels through a lightning-fast 7-speed dual-clutch transmission. The Huracán EVO Spyder launches from **0–100 km/h in just 3.1 seconds**, with a top speed of over **325 km/h**.

With **Lamborghini Dinamica Veicolo Integrata (LDVI)**, rear-wheel steering, and torque vectoring, the Spyder adapts to your driving style in real time — making it incredibly intuitive and thrilling, whether in the city or on the mountain roads.

Built for Dubai's Open Roads

From cruising JBR at sunset to taking on the twisty roads of Hatta, the **Huracán EVO Spyder** in **Blue with a Black interior** and **carbon seating** is made for those who live boldly, drive harder, and hear the V10 with the roof down.
