## 2010 Ferrari 599 GTB Fiorano

### V12 Heritage. Grand Touring Excellence. A Modern Ferrari Icon.

The **2010 Ferrari 599 GTB Fiorano** stands as one of the most iconic front-engine V12 Ferraris of the modern era — named after Ferrari's legendary Fiorano test circuit. Designed by Pininfarina and powered by the same V12 engine found in the Enzo, the 599 GTB offers pure grand touring emotion with uncompromising performance. Finished in **Black with a Tan leather interior**, this example captures the perfect balance between stealth, elegance, and Italian performance art.

Now available at **Exotic Cars Dubai**, it's a rare opportunity to own a V12 masterpiece.

### Exterior — Black Silhouette, Sculpted Presence

The **Black exterior** adds drama and subtle aggression to the 599's flowing proportions. The long bonnet, muscular fenders, and flying buttresses are all design cues crafted for both aerodynamic function and timeless form.

Signature elements include:

1. Large front air intakes and hood vents
2. Quad circular taillights
3. Chrome prancing horse badging
4. 20-inch alloy wheels with carbon-ceramic brakes

It's sleek, stealthy, and distinctly Ferrari — whether parked at a marina or charging through mountain passes.

### Interior — Tan Leather, Traditional Ferrari Luxury

The cabin is trimmed in **Tan leather**, offering a warm contrast to the dark exterior. The interior is classically Ferrari, with race-inspired design wrapped in handcrafted comfort.

Highlights include:

1. Daytona-style sport seats
2. Carbon fiber trim (optional)
3. F1-style steering wheel with integrated LED shift lights
4. Traditional gated-feel paddle shifters
5. Premium audio system and navigation

Driver and passenger are seated low and centered — connected directly to the car, yet cushioned by Italian craftsmanship.

### **Performance — Naturally Aspirated V12 Emotion**

At the heart of the 599 is a **6.0-liter V12**, derived from the Ferrari Enzo, producing **612 horsepower** and **608 Nm of torque**. It accelerates from **0–100 km/h in 3.7 seconds**, with a top speed exceeding **330 km/h**.

The car features:

1. Rear-mounted transaxle for balance
2. F1 SuperFast 6-speed automated gearbox
3. Magnetic Ride Control suspension
4. Advanced traction and stability systems

It's refined on the highway, brutal when unleashed — a true GT car built for long-distance speed.

### **A Collector's Ferrari with Timeless Character**

With its **Black and Tan color combination**, classic grand touring layout, and naturally aspirated V12, the **Ferrari 599 GTB Fiorano** continues to grow in collector appeal. This 2010 model is a celebration of analog driving feel in a modern performance platform — built for the road, destined for legacy.
