2025 Ferrari 296 GTS

Open-Air Electrified Thrill. The Pinnacle of Modern Ferrari Performance.

The **2025 Ferrari 296 GTS** is where innovation meets adrenaline — a plug-in hybrid V6 convertible that redefines Ferrari's mid-engine DNA. Finished in a sleek **Grey exterior** over a bold **Orange interior**, and enhanced with a **Carbon Fiber interior package**, this 296 GTS is the ultimate statement for drivers who seek maximum performance and visual distinction.

Now available at **Exotic Cars Dubai**, this open-top Ferrari turns every drive into a high-performance experience.

Exterior — Grey Sophistication with Supercar Presence

The **Grey finish** gives the 296 GTS a futuristic, almost stealth-like look that contrasts beautifully with its sculpted body lines and sharp aerodynamic elements.

Exterior features include:

1. Retractable hardtop convertible (roof opens in 14 seconds at speeds up to 45 km/h)
2. Active rear spoiler integrated into the deck lid
3. Full LED headlamps with signature DRLs
4. Aero-optimized front splitter and side air intakes
5. Quad-exit exhaust system with high-mounted tips
6. Lightweight forged alloy wheels with Ferrari carbon ceramic brakes

A modern design inspired by Ferrari's racing roots and engineered for the street.

Interior — Orange Intensity with Carbon Precision

Inside, the **Orange leather interior** offers a bold contrast to the subdued exterior, while **Carbon Fiber elements** infuse the cabin with a race-inspired edge.

Interior highlights include:

1. Digital instrument cluster with hybrid energy flow display
2. F1-inspired steering wheel with touch-sensitive controls and Manettino dial
3. Carbon fiber accents on dashboard, center console, and door panels
4. Ultra-supportive racing bucket seats in premium leather
5. Integrated navigation, smartphone connectivity, and advanced telemetry
6. Optional JBL Professional sound system

It's a cockpit built for maximum engagement and minimal distraction.

Performance — Electrified V6 With Supercar Credentials

The 296 GTS is Ferrari's first-ever V6 plug-in hybrid convertible — but don't let "hybrid" fool you. This car is blisteringly fast, brilliantly balanced, and born to perform.

1. **3.0-liter twin-turbocharged V6 + electric motor**
2. **830 horsepower** combined output
3. **0–100 km/h in just 2.9 seconds**
4. Top speed: 330+ km/h
5. 8-speed dual-clutch F1 transmission
6. Rear-wheel drive with eManettino hybrid mode selector
7. Plug-in hybrid with up to 25 km of all-electric driving range

Track-level response. Street-level versatility. Zero compromise.

Built for Dubai's Supercar Scene

From JBR to Jebel Hafeet, the **296 GTS in Grey with Orange leather and carbon interior** is a show-stopper — both in performance and presence.
