Overview — Aston Martin's Most Powerful DB11, Now in Dubai

The **2021 Aston Martin DB11 AMR V12** is the pinnacle of the DB11 range — the **Aston Martin Racing Edition** that takes the already-exceptional DB11 V12 and elevates it to the very limits of road car performance and specification. The **AMR designation** — drawn directly from Aston Martin's racing programme — brings a host of performance enhancements, visual upgrades, and exclusive appointments that mark this as the most desirable and focused DB11 ever produced. This stunning example, finished in **sleek Black with a dramatic Red interior**, is now available at **Exotic Cars Dubai**. For the buyer seeking the **ultimate British grand tourer in Dubai** — maximum V12 performance, race-inspired character, and handbuilt Aston Martin craftsmanship — the DB11 AMR is the undisputed answer.

AMR Performance — 630HP V12, Race-Inspired Engineering

The DB11 AMR is powered by Aston Martin's **5.2-litre twin-turbocharged V12 engine**, re-tuned by the AMR division to produce **630 horsepower and 700 Nm of torque** — an increase of 22 horsepower over the standard DB11 V12. This exceptional powertrain launches the DB11 AMR from 0–100 km/h in **3.7 seconds** with a top speed of **334 km/h** — making it the fastest-ever DB11 at the time of its introduction. The **AMR-specific suspension tuning**, recalibrated steering, and **uprated carbon ceramic braking system** sharpen the DB11's dynamic responses into something altogether more focused and driver-centric — a grand tourer that rewards commitment and skill with a level of **communication, precision, and exhilaration** that only an Aston Martin built at Gaydon can deliver.

Exterior — Black with AMR-Exclusive Visual Identity

In **Jet Black**, the DB11 AMR's long bonnet, sweeping roofline, and muscular haunches achieve a presence of profound depth and drama. The **AMR-exclusive exterior enhancements** — comprising the darkened grille mesh, **gloss black AMR badging**, black brightwork, and **unique 20-inch AMR forged alloy wheels** — distinguish this vehicle immediately from the standard DB11, giving it a darker, more purposeful character that perfectly reflects its enhanced performance credentials. The **aeroblade rear system** — which channels air through hollow C-pillars to generate downforce without a conventional spoiler — remains one of the most elegant aerodynamic solutions in the modern supercar world, and in black it is quite simply invisible until you know where to look.

Interior — Red Leather & Aston Martin's Handbuilt Craftsmanship

The **Red leather interior** of this DB11 AMR is a specification of extraordinary drama, confidence, and individuality — a colour that has graced some of the most celebrated Aston Martins in the marque's 110-year history. Against the Black exterior, the red cabin creates a **visual tension of breathtaking effect**, confirmed the moment the door opens. Every surface — seats, dashboard, door cards, and steering wheel — is finished in **hand-stitched Bridge of Weir leather** with **AMR-specific contrast stitching and embossed headrests**. The **dual 10-inch infotainment screens, sports seats with full power adjustment**, and Aston Martin's **premium audio system** complete a cabin that is as exquisitely made as any object produced in Britain today — a fitting environment for the most focussed DB11 ever built.

Visit Exotic Cars Dubai — Experience the DB11 AMR Today

This **2021 Aston Martin DB11 AMR V12 in Black with Red interior** is available for immediate private viewing at **Exotic Cars Dubai**.
