	Horse Power	900+ HP
	Engine Size	
	Specs	GCC
	Warranty	Nov 2028

Overview — The World's Fastest Electric Car, Now in Dubai

The **2025 Porsche Taycan Turbo GT Weissach** is the most extreme, most powerful, and most track-focused production Porsche ever built — a vehicle that has rewritten the record books and redefined what an electric car is capable of. This extraordinary example, finished in a **rare and stunning Purple exterior** with a **full carbon fibre interior**, is now available at **Exotic Cars Dubai**. With the **exclusive Weissach Package** delivering maximum weight reduction and aerodynamic optimisation, this Taycan Turbo GT is not merely the most thrilling electric car in the UAE — it is one of the most significant performance cars of any kind available for sale in Dubai today.

Performance — 1,092BHP, Nurburgring Record Holder

The Taycan Turbo GT produces a staggering **1,092 horsepower** from its **800V dual permanent-magnet electric motor system** — the highest output ever achieved in a production Porsche road car. This extraordinary powertrain launches the Taycan Turbo GT from 0–100 km/h in a barely comprehensible **2.2 seconds**, with a top speed of **305 km/h**. The **Weissach Package** — named after Porsche's legendary research and development centre — adds a front-axle carbon fibre anti-roll bar, titanium roll cage components, and Michelin Pilot Sport Cup 2 R tyres, collectively shaving critical weight and sharpening every dynamic response. This is the Taycan that broke the **Nurburgring Nordschleife electric car lap record** — a testament to its extraordinary capability.

Exterior — Striking Purple in the Weissach Specification

This Taycan Turbo GT arrives in a **bespoke Purple exterior** — an extraordinary and deeply individual colour that captures the car's avant-garde performance character with complete conviction. Purple on the Taycan Turbo GT is a statement of absolute confidence — bold, rare, and utterly distinctive in any environment. The **Weissach-specific aerodynamic package** — featuring a fixed carbon fibre rear wing, an aggressive front splitter, and optimised underbody aerodynamics — gives this already dramatic silhouette a visual intensity that leaves no doubt about its performance intent. Under Dubai's sunlight, the Purple finish shimmers with a depth that makes this one of the most visually arresting cars on any road in the UAE.

Interior — Full Carbon Fibre, Track-Ready & Uncompromising

Inside the Taycan Turbo GT Weissach, the **full carbon fibre interior package** strips the cabin to its performance essentials — every panel, every surface, and every trim element executed in genuine woven carbon to minimise weight and maximise driver focus. **Lightweight carbon bucket seats with six-point harness provisions** hold occupants firmly in place under the most aggressive cornering forces, while the **GT-specific steering wheel, carbon pedals, and Porsche's curved 16.8-inch infotainment display** ensure the driver has complete command of every system at all times. This is a cockpit that communicates, at every moment, that the Taycan Turbo GT Weissach was engineered for one purpose above all others — absolute, uncompromised performance.

Visit Exotic Cars Dubai — Secure This Hypercar Today

The **2025 Porsche Taycan Turbo GT Weissach in Purple** is one of the rarest and most extraordinary performance cars available anywhere in the Middle East. We invite all serious collectors and performance car enthusiasts to arrange an exclusive private viewing at **Exotic Cars Dubai**.

Turbo

A close-up photograph of a carbon fiber aerodynamic wing, likely a rear wing, mounted on a blue car. The wing features a white logo consisting of a stylized track outline and the word "WEISSACH" in a bold, sans-serif font. The carbon fiber texture is clearly visible, and the wing is set against a blurred background of the car's body panels.
