Overview — BMW's Most Sophisticated Electric Saloon in Dubai

The **2024 BMW i5 eDrive40** represents the next chapter in BMW's remarkable evolution — a **fully electric luxury saloon** that delivers everything the legendary 5 Series has always stood for — sophisticated design, dynamic performance, and an exceptional interior — now powered entirely by a **state-of-the-art electric drivetrain**. This stunning example, finished in a **cool and contemporary Nardo Grey**, is now available at **Exotic Cars Dubai**. The i5 eDrive40 is the choice for the forward-thinking buyer in Dubai who demands **zero-compromise luxury, cutting-edge technology, and effortless everyday performance** — all delivered with the refinement, prestige, and driving pleasure that the BMW name has always promised.

Performance — 340HP Electric Drive with Instant Torque

The i5 eDrive40 is powered by a **rear-mounted electric motor producing 340 horsepower and 430 Nm of torque** — available instantaneously from a standstill in a manner that no internal combustion engine can replicate. The result is 0–100 km/h in just **6.0 seconds** with a top speed of **230 km/h**, delivered in near-total silence and with a **seamless, wave-like surge** of acceleration that transforms every journey. The **81.2 kWh battery** provides a real-world range of up to **582 kilometres on a single charge**, while **205 kW DC fast-charging capability** restores the battery from 10% to 80% in approximately 30 minutes — making the i5 eDrive40 as practical for long GCC highway journeys as it is effortless for Dubai's daily commute.

Exterior — Cool Nardo Grey on BMW's Refined Electric Silhouette

In **Nardo Grey**, the i5's elegant, aerodynamically optimised saloon body achieves a **cool, contemporary sophistication** that perfectly suits its progressive electric character. Nardo Grey has established itself as one of the definitive colours for the modern performance-luxury car — understated, purposeful, and deeply confident — and on the i5's long, low, and beautifully proportioned body, it creates a presence of quiet authority that is entirely appropriate. The **i-specific design language** — flush door handles, a closed kidney grille, aerodynamic wheels, and BMW's iconic L-shaped LED headlights — give the i5 a distinctly forward-looking identity that sets it apart from every other saloon on Dubai's roads whilst remaining **unmistakably, proudly BMW** in every proportion and detail.

Interior — BMW Curved Display, Premium Technology & Luxury

Inside the i5 eDrive40, BMW's commitment to premium cabin quality reaches a new level of technological sophistication. The centrepiece is the **BMW Curved Display** — a seamlessly integrated **12.3-inch instrument cluster and 14.9-inch touchscreen** — running BMW's latest **iDrive 8.5 operating system** with intelligent personal assistant, over-the-air update capability, and full smartphone integration. The **Harman Kardon premium audio system**, **four-zone climate control**, and **panoramic glass sunroof** create a cabin of genuine warmth and refinement, while **sport seats with full power adjustment, heating, and ventilation** ensure every journey is experienced in the complete comfort that befits a **flagship BMW luxury saloon** available for immediate private viewing in Dubai today.
