2024 Aston Martin DB12 for Sale in Dubai

Contemporary British Grand Touring

Discover this sophisticated **2024 Aston Martin DB12 for sale in Dubai**, presented in a rich **Dark Blue exterior** with a striking **Red interior**. Showing just **5,000 km**, this beautifully specified grand tourer combines unmistakable Aston Martin design with impressive V8 performance, modern technology and the comfort expected from the marque's latest generation.

The DB12 represents a new chapter for Aston Martin's celebrated DB bloodline. Elegant enough for long-distance touring yet engineered to deliver genuine performance when required, it brings together the qualities that have made Aston Martin one of Britain's most admired luxury sports car manufacturers.

For buyers searching for an **Aston Martin DB12 for sale in Dubai**, this example offers an especially attractive combination of low mileage, sophisticated exterior colour and a bold contrasting cabin.

Elegant Dark Blue Exterior

The **Dark Blue exterior** beautifully complements the DB12's sculpted proportions. Its long bonnet, muscular rear haunches and distinctive Aston Martin grille create a commanding profile without sacrificing the understated elegance traditionally associated with the brand.

The deep blue finish gives the car a refined appearance in daylight while emphasising the body's flowing lines and athletic stance. It is a particularly sophisticated alternative to more conventional sports car colours and works exceptionally well with the DB12's modern interpretation of classic Aston Martin design.

Striking Red Interior with Electric Memory Seats

Inside, the character changes dramatically with a **Red interior** that provides a bold contrast against the Dark Blue bodywork. The colour combination gives this DB12 a distinctive personality while retaining the premium atmosphere expected from a modern Aston Martin.

Among the notable comfort features are **electric memory seats**, allowing the seating position to be conveniently adjusted and stored according to the driver's preference. This feature is particularly useful in a grand tourer designed to make both short journeys and longer drives comfortable.

Aston Martin substantially redesigned the cabin for the DB12 generation, introducing a more contemporary interior architecture and modern infotainment technology while maintaining a strong focus on craftsmanship and driver engagement.

4.0-Litre Twin-Turbo V8 Performance

Under the bonnet, the DB12 is powered by a **4.0-litre twin-turbocharged V8**, paired with an automatic transmission. The DB12 produces approximately **671 bhp**, combining substantial performance with the refined character required of a luxury grand tourer.

That balance is central to the appeal of the DB12. It is capable of delivering serious performance while remaining a sophisticated car for everyday driving and longer journeys.

With just **5,000 km**, this particular 2024 example is especially appealing to anyone searching for a **low-mileage Aston Martin DB12 in Dubai**.

Aston Martin DB12 for Sale in Dubai
