	Engine Size	5.2L V10
	Specs	GCC
	Warranty	Available

2020 Lamborghini Huracán EVO for Sale in Dubai

Naturally Aspirated V10 Performance with Everyday Supercar Usability

Discover this striking **2020 Lamborghini Huracán EVO for sale in Dubai**, presented in a sophisticated **Grey exterior** with a sporty **Black and Red interior**. Combining Lamborghini's unmistakable supercar design with a naturally aspirated V10 engine and advanced chassis technology, the Huracán EVO delivers an engaging driving experience with the dramatic character expected from the Italian marque.

This particular example is a **GCC car**, making it especially relevant for buyers searching for a Lamborghini already specified for the Gulf market. Its understated Grey exterior provides an elegant contrast to the bold Black and Red cabin, creating a specification that is both sophisticated and unmistakably performance focused.

For enthusiasts looking for a **Lamborghini Huracán EVO for sale in Dubai**, this 2020 example brings together exotic styling, high-revving V10 performance and the usability required to enjoy a modern supercar regularly.

Sophisticated Grey Exterior

The **Grey exterior** gives this Lamborghini Huracán EVO an understated yet purposeful appearance.

Lamborghini's signature low-slung proportions remain immediately recognisable, with sharp body lines, dramatic air intakes and a wide stance contributing to the Huracán's unmistakable presence.

The EVO introduced an evolved aerodynamic design developed to complement the additional performance and advanced vehicle dynamics of the model. The result is a supercar that looks aggressive while retaining the clean, compact proportions that helped make the Huracán one of Lamborghini's most recognisable modern designs.

Finished in Grey, this particular example allows the sculpted surfaces and aerodynamic details to become the focus rather than relying purely on a bright exterior colour.

Black and Red Interior

Inside, the **Black and Red interior** introduces a much more dramatic character.

The darker Black elements establish a purposeful cockpit, while contrasting Red details reinforce the sporting personality of the Huracán EVO. Together, the colours provide an ideal counterpoint to the understated Grey exterior.

The cabin is designed around the driver, with important controls positioned within easy reach and Lamborghini's distinctive design language continuing throughout the interior.

The result is a cockpit that feels unmistakably exotic every time the driver gets behind the wheel.

5.2-Litre Naturally Aspirated V10

At the heart of the Lamborghini Huracán EVO is one of its most defining features: a **5.2-litre naturally aspirated V10 engine**.

In the Huracán EVO, the V10 produces approximately **640 CV and 600 Nm of torque**, delivering immediate throttle response and a distinctive soundtrack that has become central to the Huracán experience.

Unlike many contemporary supercars that rely on turbocharging, the Huracán EVO's naturally aspirated engine builds power progressively as the revs rise. This gives the driver a more direct connection with the powertrain and contributes significantly to the character of the car.

Power is delivered through Lamborghini's fast-shifting **seven-speed dual-clutch transmission**, providing rapid gear changes whether driving in automatic mode or using the steering-wheel-mounted paddles.

Supercar Performance

The Huracán EVO delivers performance worthy of its dramatic appearance.

With approximately 640 CV available from its naturally aspirated V10, the all-wheel-drive EVO is capable of accelerating from **0–100 km/h in around 2.9 seconds**, while its top speed exceeds **325 km/h**.

Yet outright acceleration is only part of the experience.

The EVO was developed to provide greater agility and driver engagement through sophisticated vehicle dynamics technology. Lamborghini Dynamic Steering, rear-wheel steering and the Lamborghini Dinamica Veicolo Integrata vehicle control system work together to coordinate the car's responses.

The result is a Huracán engineered to feel responsive and engaging while remaining accessible enough to enjoy beyond a racing circuit.

Lamborghini Dinamica Veicolo Integrata

A key technology introduced with the Huracán EVO is **Lamborghini Dinamica Veicolo Integrata**, commonly known as LDVI.

The system coordinates information from multiple areas of the vehicle to manage its dynamic behaviour according to the driver's inputs and selected driving mode.

Working alongside rear-wheel steering, all-wheel drive and other chassis systems, LDVI helps the EVO adapt its behaviour to different driving situations.

This technology represents an important part of what separates the EVO from earlier versions of the Huracán, combining the emotional character of a naturally aspirated Lamborghini with increasingly sophisticated electronic control.

GCC Specification

This particular Huracán EVO is a **GCC car**, an important consideration for many buyers searching for a **used Lamborghini in Dubai**.

GCC specification can be especially desirable within the UAE market, particularly for buyers who prefer vehicles originally configured for regional use.

Combined with its Grey exterior, Black and Red cabin and naturally aspirated V10, the GCC specification adds another attractive element to this particular example.

A Naturally Aspirated Lamborghini for Dubai

The **Lamborghini Huracán EVO in Dubai** offers a compelling combination of exotic performance and modern usability.

Its relatively compact dimensions make it easier to place on the road than many larger supercars, while the sophisticated all-wheel-drive system provides confident traction when deploying the V10's substantial output.

During the UAE's cooler months, the high-revving naturally aspirated engine and responsive chassis make the Huracán EVO particularly enjoyable for weekend drives and longer journeys.

At the same time, the EVO retains the dramatic appearance and sense of occasion expected from a Lamborghini, ensuring even an everyday journey feels special.

Lamborghini Huracán EVO for Sale in Dubai

This **2020 Lamborghini Huracán EVO for sale in Dubai** combines sophisticated Grey paintwork, a sporty Black and Red interior, GCC specification and the extraordinary character of Lamborghini's 5.2-litre naturally aspirated V10.

With approximately 640 CV, rapid dual-clutch transmission, all-wheel drive and advanced EVO chassis technology, it delivers the performance expected from a modern Lamborghini while retaining the emotional character associated with a high-revving naturally aspirated engine.
